

Phil-IRI

**(Philippine Informal Reading
Inventory)**

What is the Phil-IRI?

- > The development of the Phil-IRI is one of the initiatives put in place in support of the Every Child A Reader Program (ECARP).
- > The Philippine Informal Reading Inventory (Phil-IRI) was created to provide classroom teachers a tool for measuring and describing reading performance. It is an assessment tool composed of graded passages designed to determine a student's reading level.
(Flippo, R., 2014).

What is the Phil-IRI for?

- This diagnostic approach to describing how children read embraces inclusionary principles that emphasize the need for education that is learner-oriented, responsive and culturally sensitive.
- The Phil-IRI is one of the diagnostic tools that teachers can use to determine a student's abilities and needs in reading.
- It is important to note that the Phil-IRI only provides an approximation of the learner's abilities and may be used in combination with other reliable tools of assessment.

What can the Phil-IRI tell us?

- The Phil-IRI Group Screening Test (GST) can tell teachers whether students are reading at, or below, their grade levels.
- The individually administered Phil-IRI Graded Passages, can be used to assess students' Oral Reading, Silent Reading Comprehension and Listening Comprehension levels.

Assessment of Oral Reading

When used to assess oral reading skills, the Phil-IRI may be used to describe decoding and word recognition, fluency and comprehension. The student's performance in decoding (the ability to read isolated words using phonics knowledge) and word recognition (the ability to automatically identify words on sight) is measured through a Reading Miscue Inventory.

Assessment of Silent Reading

When used to assess Silent Reading Comprehension, Phil-IRI may be used to describe reading speed and comprehension. The student's reading speed is measured by recording the time it takes the child to read each passage completely. Silent reading comprehension is measured by asking the student to answer five to eight questions of varying difficulty after a passage has been read.

How do we administer the Phil-IRI?

Assessment and Instruction

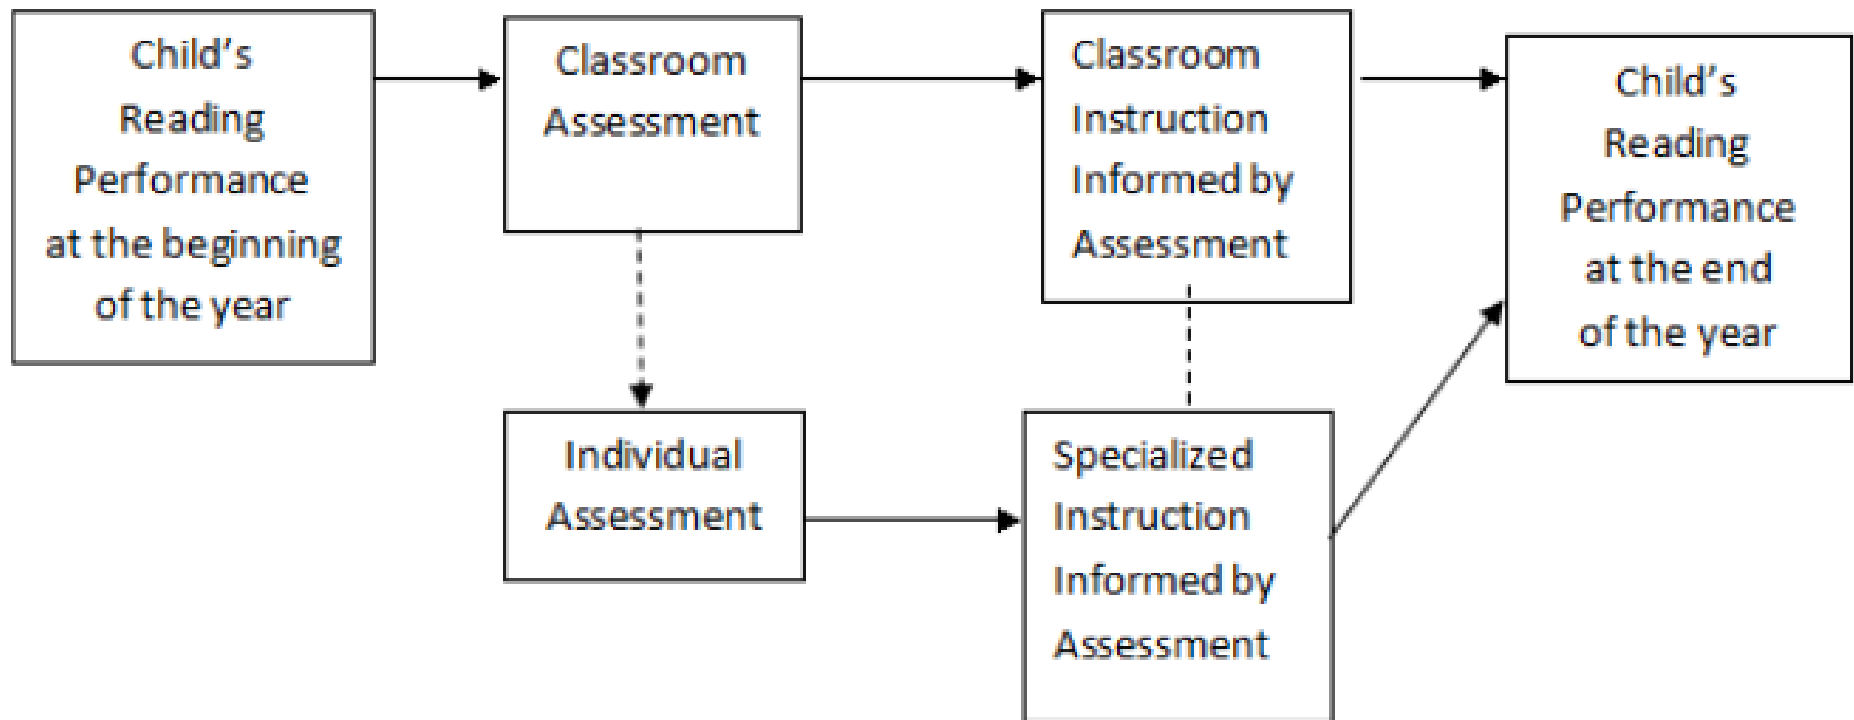

Figure 2. Assessment and Instruction for Reading Development

STEPS IN ADMINISTERING PHIL-IRI

Stage 1

➤ Administration of the Initial Screening: Group Screening Test

Interpreting the result of GST

Raw score	0-7 points → take the Phil-IRI test which is 3 levels lower than his/her grade level
in	8-13 points → take the Phil-IRI test which is 2 levels lower than his/her grade level
GST	14 or above → NO need to undergo the Phil-IRI test

Stage 1

- ***This initial screening allows the teacher to focus more on the students with reading difficulties.***

Stage 2

A. Oral Reading Test

Objectives:

1. Identify the student's miscues in oral reading;
2. Record the number of words that a student reads per minute; and
3. Find out how well a student understands the passage read

What is miscue?

a derivation or difference between what a reader says and the word in the page (Goodman, 1973)

Common Miscues of Readers

Mispronunciation

Mispronunciation – when a word is not pronounced or read properly (pupil reads a word phonetically)

Text: The children played in the yard.

Reader: *playeed*

The children played in the yard.

Underline the text and write the phonetic spelling above it.

Omission

Omission— when a word or words are omitted

Text: Tony saw an enormous elephant in the zoo.

Reader:

Tony saw an elephant in the zoo.

Circle the omitted word.

Substitution

Substitution— when one word is substituted for another

Text: The big horse started to trot.

Reader: house

The big horse started to trot.

Write the word directly above the correct word..

Insertion

Insertion— when one word or words are inserted.

the

Text: His big sister is in ^ school.

Reader:

His big sister is in the school.

Indicate it with a caret at the point of intersection and the word is written above the caret.

Repetition

Repetition— when a word or phrase is repeated

Text: The red roses are in the lovely vase.

Reader:

The red roses are in the in the lovely vase.

Draw a line from the point at which the readers decides to retrace his steps to the point the repetition begins.

Transposition

Transposition– when two words are reversed

Text: The dog is barking at me.

Reader:

The dog is barking at me.

Use a proofreader's symbol for transposition.

Reversal

Reversal– when two letters are reversed

Text: d a b

dab

Reader: b a d

Use a proofreader's symbol for transposition.

Omission of Punctuation

Omission of punctuation– punctuations are not given attention.

Text: The teacher greeted the pupils, then she told them to sit down.

Reader:

The teacher greeted the pupils
then she told them to sit down.

Circle the omitted punctuation mark.

Omission of Punctuation

Omission of punctuation– punctuations are not given attention.

Text: The teacher greeted the pupils, then she told them to sit down.

Reader:

The teacher greeted the pupils
then she told them to sit down.

The punctuation is circled.

Recording Oral Reading Miscues

Table 4. Marking and Scoring the Oral Reading Miscues

Types of Miscues	Marking the Miscue	Example	Scoring
Mispronunciation	Underline the text and write the phonetic spelling above it.	sleed <u>slide</u>	Count as 1 error every mispronunciation. (The dialectal variation should not be counted as an error).
Omission	Circle the omitted unit of a language.	The <u>huge</u> elephant	Count as one error a word or a phrase omitted.
Substitution	Underline the text and write the substituted word above it	money <u>monkey</u>	Count as one error every substitution.
Insertion	Use a caret to show where the word/s was inserted	lovely the^ flowers in the vase	Count a word or a phrase inserted as one error.

Recording Oral Reading Miscues

Types of Miscues	Marking the Miscue	Example	Scoring
Repetition	Underline the portion of the text that was repeated.	They found it <u>in the</u>	Count as one error every word or phrase repeated.
Transposition	Use a transpositional symbol over and under the letters or words transposed.	The girl ^{is} pretty	Count as one error every transposition made.
Reversal	Write the word/nonword above the correct word.	dab bad	Count as one error every reversal made.
Self -Correction	Write S above the word that was self-corrected	S <u>hasn't</u>	Don't count self-correction as an error.

Sample of Teachers Running Record

Late's heb soam soamer foon say Lay
"Let's have some summer fun," says Leo.

Lit's swim-ming dah rib say Lin
"Let's go swimming in the river," says Linda.

soam gart s say Luh
"Let's pick some guavas from the tree," says Leo.

Let us pick flo say Lin
"Let's pick flowers," says Linda.

Dah dat it's mick foon say Ma - Mommy
"That is so much fun!" says Mama.

cluh
"But can you help me clean up the house too?"

"Yes we can," they say.

foon
"Helping can be fun too!"

Quantitative Analysis of Oral Reading Test

*** How many miscues were observed?**

What are these miscues?

*** How many minutes did it take the student to read the passage?**

*** How many comprehension questions were correctly answered?**

Computing the Percentage of the Number of Words Correctly Read

$$\frac{\text{No of words in the passage} - \text{number of miscues}}{\text{No. of words}} \times 100$$

Example:

Karlo's performance in Oral Reading

No. of words in the passage: 65

No. of miscues: 15

$$65 - 15 = \frac{50}{65} \times 100 = 76.9 \%$$

% of words correctly read: **76.9 %**

Computing Speed in Reading

$$\text{Reading Speed} = \frac{\text{No. of words read}}{\text{Reading time in seconds}} \times 60$$

No. of words in the passage : 103

No. of minutes it took Karlo to read it: 90 seconds
(1.5 mins)

$$\frac{103 \text{ words read}}{90 \text{ seconds}} = 69 \text{ words per minute}$$

Karlo's reading rate: **69 words per minute**

Computing of Comprehension

$$\text{Comprehension} = \frac{\text{No. of correct answers}}{\text{No. of questions}} \times 100$$

No. of correct answers: 4

Total number of questions: 7

$$\frac{4}{7} = .57 \times 100 = 57 \%$$

Karlo's comprehension skill: **57 %**

Reading Level – the level at which the learner can read and comprehend a leveled text or graded passage.

Different Reading Levels:

- > Independent
- > Instructional
- > Frustration

Independent Level

“I can read this on my own.”

- > The level at which a learner can read and comprehend a leveled text on his/her own.
- > The reader is familiar with most, if not all, of the words in the text. The pupils reads smoothly, fluently and with expression.
- > The level of comprehension is high.

Instructional Level

“I can read this with my teacher’s help.”

- > The level at which a learner can read and comprehend a leveled text with some guidance.
- > 90% of the words are familiar for the reader, S/he hesitates reading some words.
- > The reader understands most of what is read.

“This is difficult.”

- > The level at which a learner experiences much difficulty in reading and comprehending a leveled text
- > Most words are unfamiliar; hence, reading is choppy with lots of hesitations.
- > The readers rarely understands what s/he is reading.

Oral Reading Profile

Oral Reading Level	Word Reading Score (in %)	Comprehension Score (in %)
<i>Independent</i>	97-100%	80-100%
<i>Instructional</i>	90-96%	59-79%
<i>Frustration</i>	89% and below	58% and below

Karlo's Reading Profile

Word Reading Score : 1.5 minutes = 76.9 % *Frustration*

Comprehension Score : 4 out of 7 = 57 % *Frustration*

Reading Rate : 69.5 words per minute

Karlo's Oral Reading Profile : **FRUSTRATION**
